

LEAKGUARD™

The LeakGuard™ Fluid Containment System presents users with an alternative to inconvenient and messy containment methods, including commonly used diapers. This innovative technology allows contractors to access more jobs with strict environmental and spillage regulations that require a leak prevention system.

KEY FEATURES

NO MORE DIAPERS

Save time and money by eliminating the need for diapers.

FLUID CONTAINMENT

The LeakGuard system is capable of safely retaining the machine's hydraulic fluid.

PREVENTS REWORK

Reduce jobsite rework costs by avoiding aerial work platform hydraulic leaks.

USER FRIENDLY

Daily pad inspection and replacement is fast and easy.

AVAILABLE ON
